

NEW STAYPUT™

Shock Cord Knob with Cap

The **New Stayput™ Shock Cord Knob with Cap** is suited to any application where our standard Stayput™ shock cord knob would be used. The key difference is that we have deepened the countersink and added a neat fitting cap to cover the screw or rivet that is used to secure the knob in place. The result is a neat and tidy finish with no ugly fixing to be seen.

Key features of the NEW Stayput™ Shock Cord Knob with Cap:

- Made in Australia
- Manufactured using a UV stabilized nylon compound
- 100% corrosion free
- Available in Black & White. Other colours on request (min qty will apply)
- Quality moulding ensuring no sharp edges
